

# International Women's Day

8 March

International Women's Day (IWD) is celebrated annually on the 8th March. It provides a platform to reflect on progress realized in achieving women's recognition in all spheres of life.

It is time to appreciate the determination by ordinary women through the roles they play in their communities.

The global theme for IWD in 2022 is, "Break the bias."

Women and girls are effective and powerful leaders and change-makers. They are involved in sustainability initiatives around the world through participation and leadership. Without gender equality today, a sustainable future, and an equal future remains beyond our reach.

Let us break the bias in our communities, workplaces, schools, colleges and universities.

Together, we can all break the bias on International Women's Day (IWD) and beyond.
